intimesofdecliningeconomicgrowth companieshavetocontroltheircostsmore than ever to saveresources needed in the future regardless of the economic size of the company the processes of production and logistics play a decisive role in stabilizing procedures and avoiding waste both are important cost drivers in manufacturing companies and therefore they offer large potential savings pervasive networking in the last years has contributed to a hitherto unknown transparency of global markets this harmonization opened up new possibilities of entering foreign markets for procurement and sales to the companies the emerging global procurement strategy was understood as a chance to rethink the relocation of existing production facilities to profit from existing differences in price and performance as a resource saving factor many companies tended towards a reduction of their vertical integration by outsourcing

sections of their value chain these contracted services of production result in higher transport volumes increased complexity of supply processes and new requirements on logistic networks this trend of outsourcing has not stopped but is slowing down noticeably additionally there is an increasing proportion of companies restoring business units that were outsourced before reasons for turning back decisions are often to be found in missed goals it is not unusual that important cost factors were disregarded in the original basis of decision making in the meantime many companies have realized that it is easier to achieve stability of processes and therewith a control of costs by increasing their own contribution to production especially in times of under utilized capacities like in the current crisis insourcing can be a strategic option

diploma thesis from the year 2002 in the subject business economics business management corporate governance grade 1 FH Vienna 90 entries in the bibliography language english abstract first this thesis includes an account of the entire process of deploying a change management project as experienced at datentechnik this study also gives a detailed road map and the hours required for each part of the transformation the second outcome of this thesis is a description of what to do after finishing a change management project this includes methods to assure continuous improvement and ongoing learning in this new organizational environment in other words this is a brief description of how to switch over from rule breaking and sporadic improvement to moderate but continual improvement third this description also includes the difficulties and lessons learned in the course of the project giving an answer to the question what would you do if you could start all over again fourth this thesis includes a detailed review of literature on change management and organizational transformation in other words it includes a comparison of several approaches to change management and various management methods such as tqm iso 9001 and so on

in the current business landscape many business firms compete in one project and cooperate in another related project and they do so at the same time even more interesting is that certain members of these firms are involved in both projects this book examines this new business landscape résumé de l'éd
